

# An MIU Alumni Association Project

The primary role of this project is to develop a cryptocurrency-native endowment to support the success, functioning, expansion and permanence of Maharishi International University and its subsidiaries, initiatives, and global mission as a Consciousness-Based University.

# Rationale

---

Cryptocurrencies are an emerging phenomenon, and participants in these toolsets have a great deal of interest and in some cases experience to bring to the table. Many such adherents are enthusiastic about both the economic benefits of cryptocurrencies and their potential as investment opportunities.

As donors to MIU, cryptocurrency fans are more likely to be interested in contributing to a crypto-based endowment fund than one that is restricted to using fiat currencies.

# Plan of Action

---

We are now in a launch phase where we hope to inspire cryptocurrency and cash gifts to the fund. The next phase will involve establishing positions in a diversified portfolio of cryptocurrency investment vehicles.

# Have Questions? Get in touch...

---

We will get back to you soon.

## Private Client Services

---

Private Client Services is tailored to the needs of high-net-worth individuals,

institutions, advisors and others making large gifts. High-value donors have access to a concierge service that makes it easy to securely give large donations and hard to donate illiquid cryptocurrencies to the MIU Cryptocurrency Endowment fund while unlocking significant tax savings.

Private Client Services includes a suite of premium services including:

- White-glove donation execution for large gifts
- Large gift execution planning
- Access to a network of top crypto tax experts, accountants and appraisers

The minimum gift size for this service is \$10,000

## MIU 2.0

by Paul Stokstad | Sep 27, 2021 | Crypto

It's still the case here in late September 2021 that anyone engaged in the crypto space is a sort of visionary. Whether those visions are delusional or prophetic only time will reveal. One vision is that crypto will eventually completely enhance and secure the future...

## CryptoGreen

by Paul Stokstad | Sep 24, 2021 | Crypto

As with any new and dramatic development, it doesn't take long for someone to point out the feet of clay in the emerging phenomenon. In the case of Bitcoin, the main complaint has been the significant energy use that is required by the currency due to the "proof of...

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in the health sector has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health services, and this has led to an increase in the number of people who are employed in the health sector.

Another reason for the increase is the increasing demand for health services in the private sector. The private sector has been growing rapidly in the UK, and this has led to an increase in the number of people who are employed in the private sector. This has led to an increase in the number of people who are employed in the health sector.

A third reason for the increase is the increasing demand for health services in the voluntary sector. The voluntary sector has been growing rapidly in the UK, and this has led to an increase in the number of people who are employed in the voluntary sector. This has led to an increase in the number of people who are employed in the health sector.

There are a number of challenges that the health sector faces in the future. One of the main challenges is the increasing demand for health services. The population of the UK is increasing, and the number of people who are aged 65 and over is increasing rapidly. This has led to an increase in the number of people who are in need of health services, and this has led to an increase in the number of people who are employed in the health sector.

Another challenge is the increasing demand for health services in the private sector. The private sector has been growing rapidly in the UK, and this has led to an increase in the number of people who are employed in the private sector. This has led to an increase in the number of people who are employed in the health sector.

A third challenge is the increasing demand for health services in the voluntary sector. The voluntary sector has been growing rapidly in the UK, and this has led to an increase in the number of people who are employed in the voluntary sector. This has led to an increase in the number of people who are employed in the health sector.

There are a number of ways in which the health sector can meet these challenges. One way is to increase the number of people who are employed in the health sector. This can be done by increasing the number of people who are employed in the public sector, the private sector, and the voluntary sector. Another way is to increase the efficiency of the health sector. This can be done by increasing the number of people who are employed in the health sector, and by increasing the number of people who are employed in the health sector.
